SOFT SKILLS
• Effective Communication
• Teamwork • Time Management

LANGUAGES
• Arabic (Native)
• English (Intermediate – B1/B2)

KEYWORDS (for ATS)
React, Tailwind CSS, JavaScript, CSS, Bootstrap, HTML, etc…

Dear Mr. Hatem,

I'm reaching out to apply for the Front-End Developer position at Creativa. I have a solid background in React.js, Next.js, and TypeScript, and I enjoy building fast, responsive, and scalable web applications that deliver a great user experience.

In my recent projects, I worked on integrating RESTful APIs, optimizing performance, and improving UI responsiveness using tools like Redux Toolkit, Tailwind CSS, and Chart.js. I always focus on writing clean, maintainable code and making sure everything runs smoothly and efficiently.

What attracted me most to Creativa is that, after researching the company, I found it to be a great fit for me because of its organized system, focus on innovation, and continuous development. I truly hope to be part of your team and contribute to the company's growth in every possible way.

Thank you for considering my application. I'd be happy to discuss how I can add value to your company.

Best regards,
Mohamed Hesham Mohamed Ali
